

Our Mission

The Jamaica Social Investment Fund (JSIF) will mobilise resources and channel these to community-based socio-economic infrastructure and social services projects. Through a national partnership between central and local government, communities and private and public organisations, the JSIF will address the immediate demands of communities in a manner that is quick, efficient, effective, transparent and non-partisan.

In fulfilling its mandate, the JSIF will facilitate the empowerment of communities and assist in building national capacity to effectively implement community-based programmes aimed at social development.
